

SALT LAKE AND  
STATE NEWSTELLS OF CAPTURE  
OF TRAIN ROBBERS

Salt Lake, July 6.—Hal B. Mosby of Washington, D. C., inspector in the postoffice department who was in the city today with Inspector Durand of Denver, was feeling jubilant over the success of the detective work instituted by the department which has resulted in the capture of five of the most notorious train robbers in the country. William Matthews alias George Marvin, the ringleader of the gang, recently captured at Twin Falls, Idaho, after a long chase. He is now in jail at Boise and will shortly be taken back to Omaha to be tried with the rest of the gang, three of whom were caught there and one in Denver.

"These men have been operating all over the northwest," said Mr. Mosby, today, "and for some time they made Spokane their headquarters. We have a good case against all of them and if they are convicted, the inspectors who have been detailed on this work during the past six weeks will feel that they have made a good clean up and done the whole northwest a great service."

Those assisting in the capture are Inspectors C. M. Perkins, C. L. Patterson, and Ralph Smith, who with Mr. Mosby, were appointed about six weeks ago by Chief Inspector Frank E. McMillan of Washington, who was determined to root out, if possible, the

bunch of lawbreakers who have become so brazen in their railroad hold-ups during the last few months. The party had just reached Omaha on the journey west when a daring robbery occurred at that place the night after they got there. They immediately laid their plans and were successful in capturing three of the band. The ringleader escaped and as they came west they landed another one at Denver. From there they went to Spokane, where they received much assistance from Inspectors Riddiford and Flavin, who were familiar with conditions in the northwest. The following of clues and the real work of the inspectors they began in earnest, and took them over a great deal of the northwest and finally into Idaho, where they were instrumental in effecting the capture of the notorious Marvin.

Mr. Mosby, who is a son of Col. Mosby, who fought in the Civil war, will leave for Denver in company with Inspector Durand, who has been making one of his periodical trips.

HALL'S POCKETBOOK  
FOUND IN MAIL BOX

Salt Lake, July 6.—The pocketbook of Charles J. Hall, containing a \$2,000 draft and a letter of credit for nearly the same sum was found this morning in one of the letter boxes on Main street and delivered to Postmaster A. L. Thomas. Mr. Thomas has since been endeavoring to locate Mr. Hall, but up to noon today the owner could not be found. The draft was drawn on a Tacoma bank, and it is presumed that Mr. Hall, who is evidently the owner of the pocketbook, and its contents, had got as far as Salt Lake City on his way abroad, when he was

relieved of his pocketbook. The thief evidently kept all the money and took the letter box method of getting rid of everything that might tend to incriminate him, and at the same time be a safe way of getting them back to the owner.

## P. C. PETERSON DEAD.

Salt Lake, July 6.—Carl G. Peterson, secretary to the chief of police, received by telegram this morning the sad announcement of the death of his father, P. C. Peterson, at Tyler, Minn., the family home. The death of his father came as a shock to Mr. Peterson, who had visited his parents about three weeks ago. At that time, while the father was suffering from a paralytic stroke, his condition was not alarming.

FIGHT TO THE DEATH  
BETWEEN AUSTRIANS

Silver City, July 5.—Steve Lino-witz was stabbed through the heart and almost instantly killed by John Abramovitch, after he had inflicted fatal dagger wounds in the latter's back, during a terrible hand-to-hand encounter between the two men, following a quarrel over a card game, between 9 and 10 o'clock this morning in the Marx boarding house.

Although the original cause of the trouble is obscured by the fact that both participants and their immediate friends are Austrians, and unable to give a detailed description of the affair, it is known that Lino-witz and Abramovitch had an altercation concerning the relative value of various cards which they held. Hot words were exchanged, and they said hard things each other. The climax came when Lino-

witz called Abramovitch a vile name, and, drawing a dirk, plunged it in the latter's back again and again.

Despite the agony caused by the awful wounds, Abramovitch also drew his own dagger, and the men fought back and forth across the room. Abramovitch, who was fast weakening from loss of blood, finally concentrated his remaining strength in a last desperate lunge. He caught Lino-witz with one arm and with the other drove his dagger straight through Lino-witz's heart.

Lino-witz immediately expired. Marshal Otto Witbeck rushed to the scene of the deadly combat, and sent Lino-witz's body to the court house, where an inquest was held by Justice of the Peace Thompson.

Abramovitch lapsed into unconsciousness, and it is almost certain that he will die. He was taken to his home. His back and shoulders were slashed to ribbons, and the deep thrust in his back penetrated vital regions. He has a wife and several children, and had been employed at the Knight smelter. He laid off to celebrate Independence Day, only to become involved in a fatal quarrel.

WHAT WERE CALLED  
REAL AUTO RACES

Salt Lake, July 6.—About 300 persons gathered to see what had been advertised as automobile races, and in the language of the Dutchman, "De vass stinged." It was about the biggest farce ever pulled off in Utah, and Ed. McClelland, manager of Vandamere, made it plainly understood that the management was in no way responsible for the farce, as the

track had been leased for the day by C. W. Danie, who promoted the "race."

The nearest approach to a race was between R. H. Dowle, driving a Buick and R. C. Davis, driving a Ford. For two and a half miles the machines ran around the track and then the Buick overtook the Ford and won. The time announced was enough to make anyone dizzy even if the speed would not. There was a five-mile exhibition, which it was claimed was done in 5:34, but most of the spectators hailed from a certain state called Missouri. A bunch lined up on motorcycles for a five-mile race and then it was called off.

R. B. Archibald met with an accident. The motor threw him against the fence and knocked the breath from his body. He was unconscious when picked up but recovered before a physician arrived and said he felt all right.

PROVO HONORS  
NATION'S NATAL DAY

Provo, July 6.—The nation's birthday was celebrated in a comparatively quiet, but no less enjoyable manner here. In the morning the day was ushered in by the firing of cannon and soon after the Provo band was on the street discoursing patriotic airs. There were races by the boys and prizes were awarded the winners.

Exercises were held in the tabernacle. Hon. J. W. N. Whitcomb delivered an eloquent address on the country's past and present and the need for patriotic service on the part of its citizens to insure its future growth and greatness.

Beautiful patriotic songs were rendered by the Schubert quartet.

## SEWER TRENCH VICTIM.

Provo, July 6.—A second victim of the open sewer trench was furnished last night when the three-year old son of J. L. Lytle fell into the 13-foot trench. He was not so fortunate as the little girl who fell in Saturday night, as a severe gash was cut in his forehead. He was taken to the Provo general hospital, though the wound is not considered dangerous.

## BOARD TO REORGANIZE.

Salt Lake, July 6.—The board of education will meet tonight in its regular session, at which time the board will probably be reorganized on account of the vacancy in the presidency caused by the death of Judge H. P. Henderson. The appointment of teachers and other school workers will be taken up.

## MINING NEWS

WINGFIELD CROWD  
BUYS INTO CRESCENT

Salt Lake, July 6.—According to a letter received from the Crescent Peak property there, George Wingfield and associates have become interested in the district and will soon begin some active work there.

The Victor-Nevada property, which is one of the largest in the district, has been hampered by the lack of water with which to run its new mill. Recently it is said that the company purchased a water right sufficient to run the mill the year round.

At the Crescent Peak property some satisfactory results are being obtained and with a depth of 50 feet more it is believed that the sulphide zone will be reached. The vein shows to be 400 feet wide on the surface. It is the intention to crosscut both ways when the 200-foot level is reached.

The Gold King company, which is to the south of the Crescent peak, has called its manager to Omaha where arrangements are being made to hold and other necessary material for active work. The Superior Mining company, which is a mile and a quarter north, is laying out plans for extensive work.

The Bill Taft and Indiana companies, which have lately entered the field, are pushing ahead with some satisfactory results. According to the writer of the letter everything is assuming a more active appearance.

## GRAND CENTRAL IS BOOMING.

Salt Lake, July 6.—Grand Central was the feature of the stock market this morning, and during the past two days has jumped 30 points. The stock opened this morning with a jump to \$2, and from that it climbed to \$22 1/2 on the regular board. One of the noticeable features was that the stock went in 100-share lots or smaller and the entire trading at the morning session amounted to an average of 2,000 shares. It closed slightly weaker.

The cause for the flurry in this security is believed to be due to the recent strike at the property and in a portion of the mine yet unexplored to any extent. It has been contended by a number that this strike is the Centennial Eureka vein.

The rise in Grand Central did not help Colorado any, and the stock dropped below the \$2 mark today for the first time. At the close it was selling weak at \$1.95. Columbus Consolidated was also very weak. For some time it has been sinking, and this morning it touched the \$1.50 mark. Iron Blossom was lower, but fairly strong. Nearly every stock on the board was low. Mason Valley took a big slump and dropped below the \$2 mark. This stock was as low as \$1.95 today. Mineral Flat was lower, while Ohio Copper was strong with but little of the stock in the market.

Lower Mammoth was also lower today than it has been in many weeks. Throughout the session the market was unusually low. Provo held up well, which is due to the bright prospects the company has of getting the East Tintic Development ore body.

The total number of sales this morning was 49,050, while the amount represented was \$29,731.25.

If selling had been heavy on the exchange the market would have been in hard shape. As it was stocks were languidly absorbed, but at a much reduced price.

On the curb market Bingham Cen-

tral Standard sold at 25 1/2 cents. Eureka Swansea Extension was offered at 14 cents, and a bid of 55 cents was made for Governor. Boston Sunshine, which some say may be one of the earliest dividend payers in the state, received a bid of 40 cents today.

TALK OF MINERALS  
AROUND CALIENTE

Salt Lake, July 6.—Although many mining men of ability pass through Caliente every day, the people in that vicinity assert there has been but little done there in a mining way, although it affords some of the rarest metals. F. L. Wilson, a mining engineer, has the following to say of the district after making an examination of it:

"It has long been a question with the people of Caliente why they could not secure mills and smelters," said Mr. Wilson, "they have a great deal of undeveloped ore indications of sufficient richness, however, to indicate large deposits. There is plenty of water here to furnish power for a large mill six months of the year. There are natural reservoir sites in the vicinity for storing this water, which could be perfected at small cost, which if properly handled would supply a mill all the year round with power."

"There are a few gold, silver, lead and galena, and copper mines in the vicinity that have proven beyond doubt their permanency, aside from there I find that there really has been no prospecting that has been done in a systematic way. The prospector who 'goes it blind' in this district stands a poor chance of ever getting beyond his first samples. There is no section of the state where he needs the knowledge of geology and assaying more. Nature has placed some of the rarest metals close to Caliente. Some of these metals seldom, if ever reach a western assay office and the average assayer seldom in a life time.

"Some of the largest bodies of low grade gold ore in the state are at the very door of Caliente awaiting development."

"Gold carry nickel is abundant. Nickel is found in graphite, garnierite and noemite. These minerals are analogous to copper silicate, known as chrysocolla and it is possible they run more into copper values."

"I also find some cinnabar in this vicinity, but as no work has been done on this it is hard to determine its future. Metacinnabarite or black sulphide of mercury exists in paying quantities near Elgin, 20 miles south. This mineral greatly resembles graphite in appearance."

"There is scarcely a rock found in this vicinity that does not show tungsten."

"Acid aluminum is present in large amounts. Many mineral streaks show chalcopryite in small prisms. Above Caliente opals are plentiful, they are small but there is nothing to show that any one ever tried to find larger ones."

"A few miles south are bodies of onyx, which, if opened up may prove sufficient to work. Last, but not least, I will call your attention to the to the great beds of magnesium minerals, the New York quotations on these is \$1.25 per pound."

What is needed is expert development of these resources and then all that will be needed will be the capital.

You have the stuff, what you lack is men with push, who will show their own confidence by developing. It will not be out of place here to advise the prospector in this district not to overlook the fact that certain rocks and earths in this vicinity though not generally reckoned among minerals, frequently, frequently, proved to have not infrequently proved to be the foundation of large fortunes and for that reason are worthy the time of locating and investigation."

## TINTIC QUEEN INCORPORATES.

Provo, July 5.—The Tintic Queen Mining company has filed articles of incorporation with the county clerk. The company is named as the principal place of business. The capital stock is \$100,000, in shares of the par value of 10 cents each based on the valuation of Tintic Queen mining claims 1 to 16 both inclusive situated in North Tintic mining district. The directors and officers are: W. D. Rawson, president; Andrew M. Mason, vice president; Alfred L. Booth secretary; Leroy Nixon treasurer.

## Sad Condition of Hayti.

Hayti has been an independent nation now for more than a century and has been ruled by emperors, kings and presidents, whichever title the leader of the successful mob saw fit to take. It made no real difference. The government has been chaos tempered by despotism, it has made little or no progress in civilization, in the interior the natives have reverted to barbarism, and the sound of the voodoo drum is heard even in the suburbs of the seaports. Nature made Haiti an earthly paradise; man has made it a West Indian hell.—New York Press.

## Yom Kippur.

When everything else is surrendered that is distinctive of Jewish ceremonialism the atonement retains its grip on the vast majority of Israelites. Kippur is the last link binding them to their community, their faith and its peculiar observance.

# Maxwell

The Champion Long-Distance Car

## I Want You to Know

## About the Maxwell Automobile

I am going to tell you in a straightforward, honest way, why I believe that the Maxwell will do your work better and at less cost than any other automobile.

I have studied the problems that confront you as an automobile user and the Maxwell is the result. For Strength—Simplicity—and Reliability, the Maxwell stands supreme for everyday use.

I want to impress upon you particularly that the Maxwell is not a fad or a racing machine, but a sound, trouble-proof automobile—just the car that you need for yourself and family.

The Maxwell costs little to keep, is simple to drive, runs smoothly and has great reserve power for hills and heavy roads. With this car, you can enjoy the beauty of your country—be independent of distance—visit your friends both near and far and have at all times a ready means of going to and from town.

There are today more than 14,600 satisfied owners of Maxwell automobiles. Isn't this plain statement more convincing to you than anything I can say—for it proves Maxwell success.

Six years ago, we started at Tarrytown, N. Y., with but one factory. Today the Maxwell-Briscoe Motor Co. operates three factories—the one at Tarrytown, N. Y., a second at Pawtucket, R. I., and the third at New Castle, Ind., the largest automobile plant in the world, under one roof. In these three great factories, with over \$1,500,000 worth of equipment and floor space covering more than 65 acres, we will build this year over 12,000 Maxwells. I mention this because only with such tremendous manufacturing facilities, it is possible to produce a high-grade car and sell it to you at a moderate price.

We make six models, ranging in price from \$500 to \$1750, but I recommend to you our 20 H.P. five-passenger touring car which, with complete equipment, costs \$1450 (see illustration) or if you want a two-passenger conveyance, our Model A

Standard American Runabout at \$550, is just as reliable, just as durable and of as fine appearance as our larger car.

There are so many reasons why the Maxwell is the best automobile for hard service, that I want to get in touch with you personally, for you will do yourself an injustice if you buy any car before you first find out all about the Maxwell.

Let me send you our new illustrated catalog, together with a book called "How to Judge an Automobile." This is practical and full of helpful hints and suggestions. No matter what automobile you have in mind, it will pay you to let me send it. Of course you are under no obligation to buy and the book costs you nothing.

Now, I have done my part and ask for your co-operation. One of our six models is the car you need. Won't you write me personally and let me give you the value of my long experience in the automobile business. Drop me a line today at our main office at Tarrytown, N. Y.

Benj. Briscoe Pres.  
Maxwell-Briscoe Motor Co.

### MAXWELL-BRISCOE MOTOR CO.

PINE STREET, TARRYTOWN, N. Y.

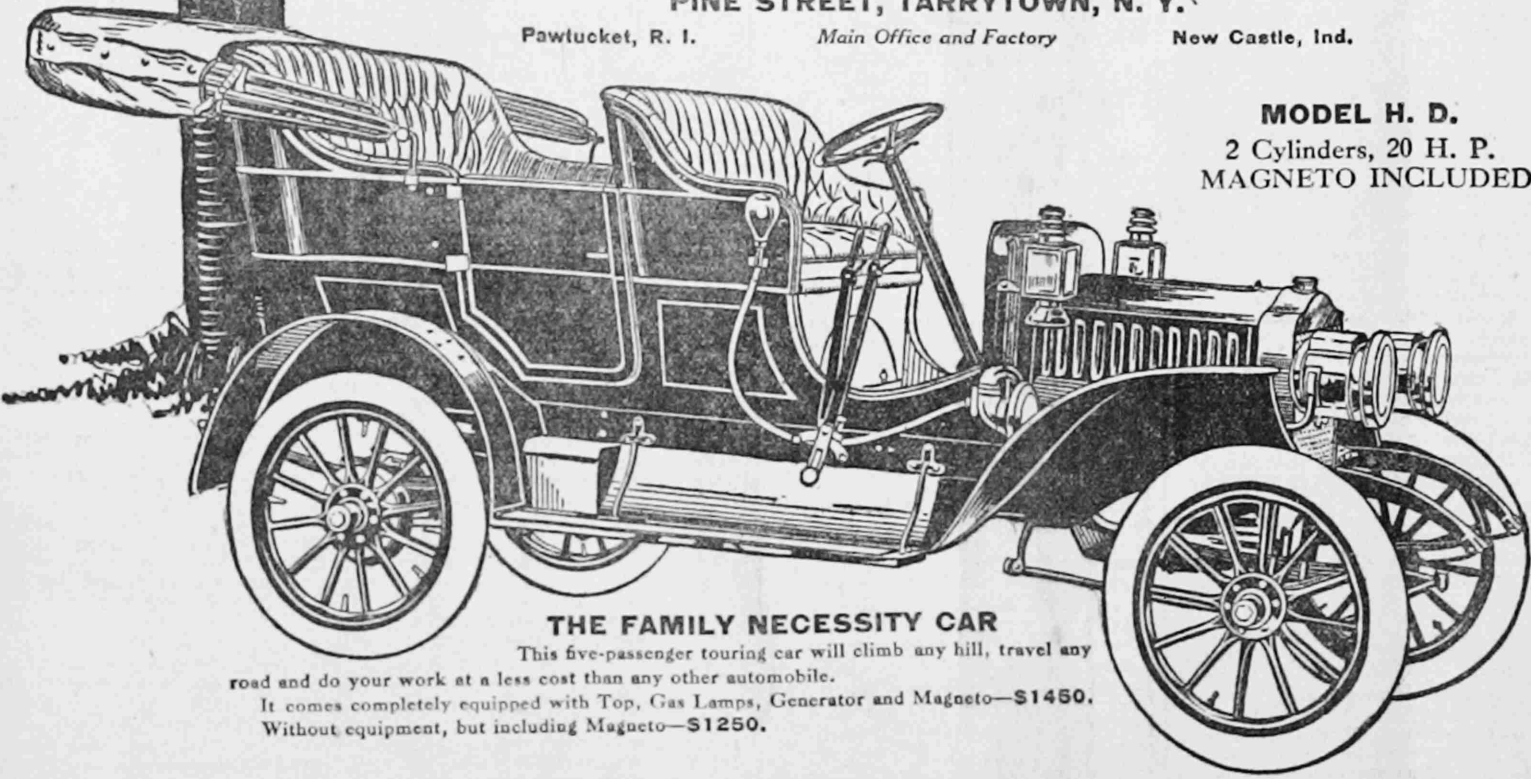

Pawtucket, R. I.

Main Office and Factory

New Castle, Ind.

MODEL H. D.

2 Cylinders, 20 H. P.  
MAGNETO INCLUDED

THE FAMILY NECESSITY CAR

This five-passenger touring car will climb any hill, travel any road and do your work at a less cost than any other automobile.

It comes completely equipped with Top, Gas Lamps, Generator and Magneto—\$1450. Without equipment, but including Magneto—\$1250.

## L. H. Becraft, Agent, Ogden, Utah
